JOSEPH TEKA

Jocode Founder | Full Stack Web Developer
Jimma, Ethiopia | https://portfolio.josephteka.com | contact@josephteka.com

SUMMARY:

Full-stack web developer, founder, and educator with a passion for building tools, platforms, and learning experiences that empower developers and startups. Experienced in creating production ready applications using modern web technologies, leading projects from concept to deployment, and mentoring learners through hands on guidance. Skilled in both frontend and backend development, deployment, collaboration, and teaching, with a proven ability to adapt, multitask, and deliver results under tight timelines. Creator of Jocode and @jocode216 YouTube channel, dedicated to helping learners grow while building professional, scalable web applications.

WORK EXPERIENCE:

FOUNDER & DEVELOPER – JOCODE | 2025–PRESENT

- Built a full-stack platform and YouTube channel (@jocode216) teaching modern web development.
- Mentored learners, developed productivity tools for developers, and deployed production-ready applications

FREELANCE WEB DEVELOPMENT PROJECTS | VARIOUS CLIENTS

- Delivered multiple front-end and full-stack solutions, meeting client requirements efficiently.

SELECTED PROJECTS:

- Amazon Clone | React, Node.js, Express, CSS, Stripe, Firebase
- Full-featured e-commerce platform with payment integration, responsive design, and dynamic product management.
- Evangadi Forum | React, Node.js, Express, MySQL, CSS
- Peer-to-peer Q&A platform for students with authentication, database operations, and real-time interactions.
- Additional Projects
- Netflix, Apple, Unsplash clones, Hotel Management System, E-commerce platform, Garage service website, and more.
- (See full portfolio at josephteka.com)

CERTIFICATIONS

- Evangadi Tech: Intensive 6-month full-stack bootcamp focused on production-level projects.
- Sololearn: Front-end development certified with practical hands-on projects.
- Database addministration from Evangadi

EDUCATION:

2022 - 2026 | Jimma University
Bachelor of Computer Science student

PROGRAMMING & TECHNICAL SKILLS:

- Front-end: React, Next.js, Tailwind, Bootstrap, HTML, CSS, JavaScript, TypeScript
- Back-end: Node.js, Express, Firebase, Superbase, MySQL, MongoDB
- Development & Testing: Git/GitHub, Postman, VS Code (extensions & workspace optimization)
